

**Rhino Rack 2500 removable 'multi-fit system.**

The Rhino 2500 system has the ability to cover a huge range of vehicle models but with the added advantage of offering a choice of cross bars allowing the best use for any particular carrying need.

The vehicle specific clamp and pad fitting kit is matched with the most appropriate leg and bar set for the purpose. What's more the racks are easily able to be fitted by the end user if so required.

This system can give users the choice of a sporty aerodynamic rack with no bar overhang ( RS model ), an aerodynamic bar that overhangs for greater load space ( DA model ), a commercial bar profile for HD use ( DH model ) and finally a classic European bar, simple but strong and a price leader too ( DS model ).

A significant advantage over other removable mount racks on the market is the strength and fit of the mounting clamps. These ensure no movement causing roof damage and a guaranteed best fit.

# Speight's Coast to Coast 2011 Entries Still Open!

**Now's the time to get some training and make an educated choice -**
